7 Steps to become CYBER-INSURABLE

- 1** Raise cybersecurity knowledge through Cybersecurity Awareness Training.
- 2** Deploy Multi-Factor Authentication.
- 3** Keep all your software, devices and firmware updated.
- 4** Develop and test your incident response plan.
- 5** Effectively manage third-parties and suppliers through regular security audits.
- 6** Encrypt your data everywhere, and control your own KEYS.
- 7** Undergo regular penetration testing, and have continuous monitoring.
